Library of Michigan is pleased
to announce that we are a state library
partner in the *NASA@ My Library* project.

NASA's Night Sky Network

The Night Sky Network is a nationwide coalition of amateur astronomy clubs bringing the science, technology, and inspiration of NASA's missions to the general public.

With numerous clubs in each state, many of them are excited to share their time and telescopes to provide your community with unique astronomy experiences at the public library and under the real night sky.

Astronomy clubs will bring a wealth of knowledge and resources to your library. Whether you're looking for a speaker, a display, or a star party, these volunteers are equipped with NASA activities and information to share.

To find a club near you:

- 1) Go to the Clubs and Events page at the Night Sky Network website: bit.ly/FindNSN
- 2) Type in your zip code and submit

For other space science activities:

- 1) Go to STAR Net's STEM Activity Clearinghouse: clearinghouse.starnetlibraries.org
- 2) Go to the Outreach Resources page at the Night Sky Network website

23rd Annual Star Party 2013

Disclaimer: Not all astronomy clubs offer public outreach, so you may need to check for clubs outside of your area or even connect to some virtual events through the network.

NASA@ My Library is a national STAR Library Network (STAR Net) initiative that connects NASA, public libraries, state libraries, and their communities. Together we are working to increase STEM learning opportunities for millions of library patrons nationwide, particularly those underserved in STEM education.

NASA@ My Library is based upon work funded by NASA under cooperative agreement No. NNX16AE30A. Any opinions, findings, and conclusions or recommendations expressed in this material are those of NASA@ My Library and do not necessarily reflect the views of the National Aeronautics and Space Administration.
